SkillBot

Digital Skilling Chatbot for Entrepreneurs and Livelihood

SkillBot is the first telegram based chatbot designed for building digital skill capacities of weavers/artisans, youth, men and women, in rural areas of India for enhancing their livelihood. An interactive chatbot customised for this purpose to engage people in a 30-learning hour curriculum, where one learning hour involves reading supplied learning materials, watching the video, listening to audio lessons, engaging in discussions, assessment and learning activities.

Following learning design approach has been adopted:

WATCH: *A series of short videos (3-5 minutes) are delivered to the learners to watch.*

DO ASSESSMENT: *Based on the videos delivered, a set of multiple-choice questions are sent as QuizBot.*

READ: *Additional reading materials are provided as infographics, charts, flashcards, or PDF files to read and deep dig into the content.*

DISCUSS: *Based on the contents of the lesson of the day, a discussion point is shared for the participants to reflect and share their thought and learning to help them better understand.*

Why SkillBot

✦ User friendly

✦ Audio and Video based courses

✦ Pre uploaded content/modules

✦ Provide analytics to track the progress for timely reviews.

✦ Availability of content in regional languages for better under standing of the beneficiaries.

✦ Inbuilt registration feature

✦ Interactive learning and personalized conversation

✦ Promote self-paced learning

- Digital Literacy
- Financial Literacy
- Citizen Services
- Digital Marketing
- Data Management
